DATASHEET

Defibtech Lifeline AED Fully Automatic Defibrillator

- The Lifeline Auto defibrillator is a one-button defibrillator which analyses the heart rhythm and will automatically deliver shocks without intervention
- It features clear voice instructions to help with the entire process from how to position the pads to when to perform CPR between shocks.
- Simple one-button operation ensures the user simply needs to turn the unit on and the device does the rest
- The standard Lifeline Defibrillator Battery (approx. 5 years) is capable of performing 125 defibrillator shocks or 8 hours of continuous operation
- Proven by independent studies to be the one of the easiest AED's for use by untrained operators
- 8-year manufacturer's warranty including free software upgrades in line with resuscitation guidelines
- Tested to military standards, making the AEDs extremely robust and durable
- Complete daily, weekly and monthly self-tests to ensure the units are always 'rescue ready' and require no maintenance
- Clear voice instructions, including CPR coaching to further simplify the rescue for responders
