

TYVEK 200 EASYSAFE WHITE LARGE (D14886050)

Product Code

DESCWL

DuPont Easysafe - Don't just wear anything!

A certified Type 5, 6 chemical protective coverall from DuPont that is based on a new optimised polyethylene non-woven fabric at low cost to meet budget requirements.

Made of polyethylene non-woven fabric, these hooded protective coveralls help provide protection against particles (Type 5) and limited liquid splashes (Type 6). Benefiting from DuPont fabric technology, the Easysafe is a coverall that offers demonstrably more protection than equivalent SMS garments and that is more robust than microporous films.

Offering a great balance of protection and comfort, the Easysafe is the new, best basic solution from DuPont for those working on jobs that are less demanding in terms of protection and on a tighter budget.

- A certified Type 5, 6 chemical protective coverall from DuPont that is based on a new optimised polyethylene non-woven fabric
- Soft touch fabric for wearer comfort
